2. It'd be wonderful to have more translators, cleaners and typesetters. For cleaners and typesetters please note that you should be able to use Photoshop. No gimp, or any other kind of photo editting programs. It's mandatory for you to be able to use PSD file.

3. As requested, I have added the decoded alphabet chart for the alien language translation here. As I have said before in the news on our frontpage, I won't translate the alien language because I think we are supposed to read the manga in the perspective of humans. (The credit for the chart goes to an anony-mouse from 2chan)
